AUDIOLOGO™

MUSIC & SOUNDDSIGN THAT BRINGS REAL VALUE TO YOUR MULTIMEDIA

### Dear AudioLogo user,

It has been 8 years already since the idea for AudioLogo was formed and marketed. Many enthusiastic users have given it a go to add music and voice-overs to their multimedia productions.

As you know, the music library is not the most extensive, and it has been a little quiet around AudioLogo, but that doesn't mean we have been sitting still.

### VoiceModule

Up to now, it was only possible to use the VoiceModule, allowing you to choose a language and voice and immediately be shown a price based on the length of text entered, if you also used the AudioLogo software. We are currently finalising a completely new web site that has all these functions and a whole lot more! You will then no longer need the AudioLogo software to quickly and easily order a voice.

### MusicModule

As regards the MusicModule of AudioLogo, some things will be changed here as well.

The immediate reason is the new OS: *Lion* for IntelMac's.

AudioLogo is no longer compatible with this OS.

Because we have been working with the idea to make AudioLogo fully 'on-line', this means that there will be no further development on software updates for AudioLogo. Therefore, version 2.5 is and will remain the last available installer for both Mac and PC.

In the end, the MusicModule will also be recreated from scratch and be made available in an on-line environment, with a larger network of composers, giving you a much wider choice of music in the music library. This will, however, take some time, and there is currently no estimate yet for when this platform will be available.

### Offer

For current users who would prefer to continue working with AudioLogo, and who aren't jumping at the first opportunity to switch over to *Lion*, we therefore now offer the option to expand content in an economical way by taking advantage of a special offer.

And this is quite a generous offer: we give you a discount of no less than 70% on all styles! And if you are really going all-out and want to have all the styles we ever published -over 10 hours of base blocks in total- we will give you an additional 25% discount on the total amount.

This means that you can now possess all styles for €1.890,= (excluding VAT), with a value of €9.150,=! This will be discounted further for the styles you already have.

### Download

Download the [order list](#) and take a look on our web site for details about this [special offer](#). Here, you can take your time to listen to all the styles once more, and see what the special offer price is for each style.

Kind regards,  
The AudioLogo Team

*Note: Despite the fact that the software is no longer supported on the latest platforms, you can still continue using the music without the software.  
To learn how to do this, download these [instructions](#).*
